

Oyera Auto Service Bay Ltd (OAS Bay)

At the service bay station, heavy, small and commercial cars come in for engine oil and filters, gear box oil and filters, brake fluids, Brake pads change, greasing and other minor repairs.

They also do wheel alignment and balance. A car can come in for one or more services a day. One technician or more can handle a car service.

They have service/repair parts on sale that's; filters, engine and gearbox oil, filters among others.

Business

When a car comes, a senior technician determines the parts and oils needed for the car and the owner buys it. Then the car is taken to a service bay, after which a charger of 20000 is charged for labour.

Engine oils range between 79000-200000. Brake fluids range between 13000-2000, oil filters 15000-20000.

A car for wheel alignment is charged 30000 and for balance is charged 20000.
All in Ugandan currency.

As a software engineer student at Refactory, you are required to develop a web system/application for records management of the bay.

You are required to use knowledge acquired from both technical and non-technical modules of your respective tracks.

Good luck
